Thema Comments on 2 MW project in Karnataka

Please find below:

- (1) The project proponent seems to have faced a quiet a few barriers. Are these barriers specific to the Project? If not, how does it act as a barrier?
- (2) The IRR calculations are not clear and values that are taken are not conservative. What is the basis for this calculation?
- (3) The risks and barriers if found to be pertinent to the Project must be quantified.

Thank you
